Description:

Review From Stephen Harrod Buhner, author of Healing Lyme -- I finally had the time to read your book on rife machines and Lyme Disease and just wanted to let you know that I think you did a great job. It is well written, very clear, and explains the concepts very well. In addition, your voice through the text is exceptionally supportive and kind. I feel that I know enough about rife machines now to be able to respond well to those who ask me about them. I am beginning to think that the most effective approach now might just be the Core Protocol herbal regimen [as discussed in my book] and rife machines. --Stephen Harrod Buhner, author of Healing Lyme

From Richard Loyd, Ph.D. -- This book provides life-saving insights for Lyme Disease patients. -- Richard Loyd, Ph.D., coordinator of the Annual Rife International Health Conference

From Robert Andrew, M.D. -- Finally a valid, non-pharmaceutical treatment for this devastating illness. --Robert Andrew, M.D.

About the Author Bryan Rosner is an internationally recognized author, educator and speaker. His articles and books on Lyme Disease have received critical acclaim from patients and physicians in more than 15 countries. Bryans first book, Lyme Disease and Rife Machines, has earned bestselling status in the United States, Europe, and elsewhere in the world. Bryan's work goes beyond merely educating the world about Lyme Disease. He is also active in the Lyme Disease community itself in 2003, Bryan founded the Electromedicine and Lyme Disease Research Forum, which currently has more than 2,000 participating members. In 2006, he founded Lyme Community Forums, which is becoming known as a hub for Lyme Disease communication and education. The research substantiating Bryan s work is derived from numerous sources, including his personal experience with Lyme Disease, input from hundreds of other Lyme sufferers, clinical and laboratory studies, and collaboration with leading physicians on several continents. Bryan s books are known to include not only treatments popular in the United States, but also successful healing modalities found throughout the world. In fact, Bryan communicates with researchers and physicians worldwide, and many of the treatments found in his books are unpublished and unknown to the public in the United States. In this way, his writing is balanced and broad, offering readers a wide array of treatment options from which to choose. Bryan Rosner works as a journalist in the healthcare industry and lives in the mountains of Northern California with his wife Leila.
